Streamgaging and Forecasting Linkage

- Forecast rainfall
- Estimate runoff
- Simulate river flows
- Convert river flows to river stage

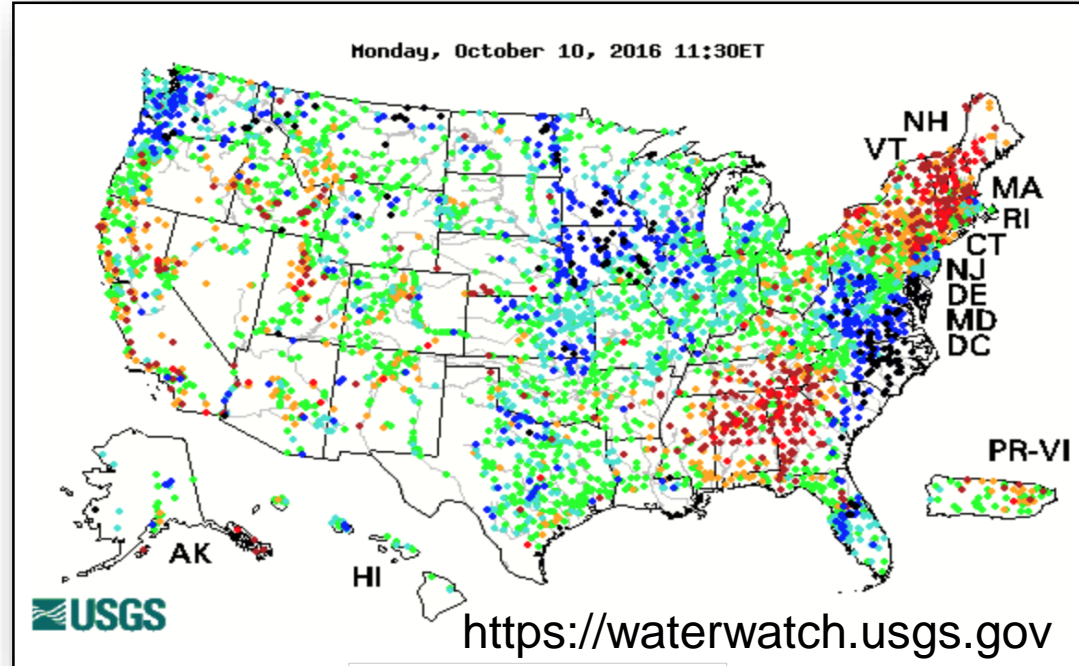

Rainfall-Runoff Model

USGS Streamgauge Network

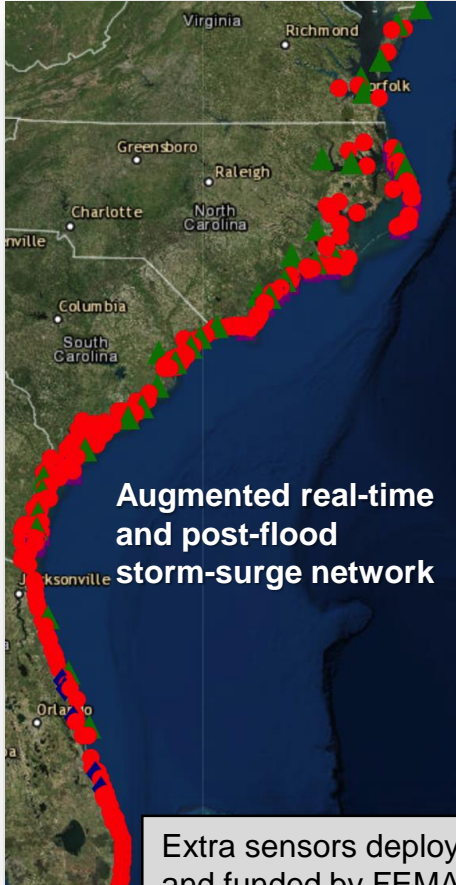

- **8,100 sites; all real-time**
 - Consistent, high quality
 - Monitor floods to droughts
- **3,400 support NWS forecasts**
- **1,200 support USACE flood control operations**
- **Supports the FEMA Mission**
 - Approx. 1/2 of FEMA floodplain maps based on USGS data from streamgages
 - USGS streamgauge data support Disaster Declaration process (extent, magnitude, frequency)
- **Supports Critical Infrastructure**
 - Design, permitting, and operation of thousands of water- and waste-water treatment plants, irrigation works, power plants, etc.

Funding is Cooperative and Site Specific

USGS has over 850 Federal, State, and Local partners whose funding and collaboration supports the operation of the USGS Streamgaging Network

USGS Event-Driven Posture

Extra sensors deployed for Hurricane Matthew and funded by FEMA Mission Assignments

- **Streamgage Network Operations (Every day)**
 - Streamflow data supports national water security and partners
- **Rapid Deployment Streamgages**
 - Provides temporary real-time STAGE data for critical locations
- **Non-transmitting stage sensors**
 - Coastal storm surge, river flooding, dam breaks
 - Provides post-event calibration data for modeling
- **Flood documentation**
 - High-water mark flagging and surveying
 - Post-flood “indirect measurement”
 - Inundation mapping computations
 - Supports accurate damage assessment and adaptive planning days after flood
 - Facilitates flood-insurance map verification
- **Flood-frequency calculations**
 - Essential for bridge, dam, levee design and repair/replacement

FEMA

FEMA's mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards.
