## Backwater Overview

### Backwater Flooding Overview

- The backwater high levels in Humphreys, Issaquena, Sharkey, Warren, and Yazoo counties have prevented local officials from safely documenting damages, and cost projections for the restoration of damaged homes and infrastructures
- The economic damage to the region and workers in the agricultural industry is severe. Within the backwater counties alone, the aggregate total for crop damages collected by the USDA stands at \$648 million and is expected to exceed \$800 million
- Both USACE and Mississippi Levee Board data clearly shows the water levels in the backwater counties have remained at or above flood levels exceeding 130 days, with some areas exceeding 150 consecutive days

## Closing Comments

### Challenges:

- Ongoing inclement weather patterns and flooding
- Inaccessible areas

### Strengths/Successes:

- Local Hire Initiative for PA, MIT, LOG and EHP staff
- Utilization of (3) no cost to the government remote Area Field Offices
- Utilization of virtual FL staff for Mitigation
- Utilization of Region IV Finance and Administration, External Affairs and Recovery Division support
- The great working relationship with the State
