

Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting

The attached Fact Sheet summarizes how organizations should consider and manage their personal protective equipment (PPE) needs while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The COVID-19 National Strategy for Addressing Personal Protective Equipment (PPE) Shortage seeks to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: reduce, reuse and repurpose. Industries that use similar PPE (e.g., N95 respirators) as part of their normal duties will be challenged in obtaining PPE while available supply is prioritized for healthcare workers and first responders. Industries whose essential critical infrastructure workers need PPE to perform their duties should continue working with suppliers to acquire needed PPE, but should expect shortages to continue. All industries should immediately implement strategies to preserve existing supplies of PPE and find alternative work methods to address shortfalls. A critical component in implementing PPE preservation strategies is determining the appropriate level of PPE for use. Non-healthcare industries should carefully consider whether PPE is required by law or regulation as part of their routine duties, or whether it is needed for mitigating employee exposure to COVID-19.
