Cyber Fundamentals 100 (CF100)

CF100 is an 80-hour course that introduces students to hardware and software basics, operating systems, network architecture, and internet applications. It is the first installment of a two-part curriculum providing foundational cyber knowledge to cyberspace workforce elements and Department of Defense (DOD) personnel, whose duties include protecting DOD information systems from unauthorized and/or illegal access. The course contains three units comprising multiple lessons; each unit culminates in a unit Milestone Exam and the course ends with a Capstone Exam. A test-out option is available at the start of each unit so that qualified personnel may bypass portions of the course.

Delivery: Online asynchronous (Self-paced/no instructor)

Duration: 80 hours of training over 3 weeks

Prerequisite: None

Scheduled offering:

CF100-2403-OL (13 NOV – 2 DEC)

Cyber Fundamentals 200 (CF200)

CF200 is an 80-hour course that serves as the second installment of a two-part curriculum to provide foundational cyber knowledge to cyberspace workforce elements and Department of Defense (DOD) personnel, whose duties include the protection of DOD information systems from unauthorized and/or illegal access. The course comprises three units with multiple lessons; each unit culminates in a unit milestone exam and the 2 course ends with a Capstone Exam. There is a test-out option available to permit qualified personnel to bypass the course.

Delivery: Online asynchronous (Self-paced/no instructor)

Duration: 80 hours of training over 3 weeks

Prerequisite: None

Scheduled offering:

CF200-2403-OL (13 NOV – 2 DEC)

FY24 November Offerings

Cyber Incident Response Course (CIRC)

The Cyber Incident Response Course (CIRC) is an 80-hour course that prepares students in cyber incident response and evidence collection. In this course, students are provided various scenarios to understand and develop response protocols in a real-world environment. Using trusted forensic tools, students identify and extract digital evidence from various devices such as computers, cell phones and small form factor digital storage devices. Students are taught how to properly document evidence using lawful, professional techniques to ensure the legal admissibility of the seized evidence. CIRC contains three units with quizzes and a course Capstone Exercise.

Delivery: In-residence

Duration: 80 hours of training over 2 weeks

Prerequisite: INCH

IACET CEU-eligible, ACE Recommendation

Scheduled Offering:

CIRC-2402 (27 NOV – 9 DEC)

Cyber 101 (CY101)

Cyber 101 (CY101) is a 40-hour course that is designed to provide fundamental cyber knowledge to students interested in developing cyber competency or who are in roles where they support cyber operations (such as CPTs, MDTs). CY101 is a requirement for any personnel identified in DoDD 8140 as a “cyber enabler.” The course consists of five units containing modules and lessons, unit Milestone Exams, and a final, graded Capstone Exam.

Delivery: Online asynchronous (Self-paced/no instructor)

Duration: 40 hours of training over 3 weeks

Prerequisite: None

Scheduled Offering:

CY101-2403-OL (13 NOV – 2 DEC)

FY24 November Offerings

Cybersecurity Analyst (CySA+)

Cybersecurity Analyst (CySA+) is a bootcamp-style course that teaches incident detection, prevention, and response through continuous security monitoring for success in a high-stakes analysis. Students learn processes in security operations, vulnerability management, incident response and management, and how to apply best practices for reporting and communication. Vouchers are not included.

Delivery: In-residence

Duration: 40 hours of training over 1 week

Prerequisite: None

Scheduled Offering:

CySA+-2402 (13-18 NOV)

Introduction to Cyber Investigations (ICI)

Introduction to Cyber Investigations (ICI) is a 40-hour course that prepares students to perform or support the role of a case agent responsible for a basic cyber investigation. ICI is designed for Defense Criminal Investigative Organizations (DCIOs), cyber-intrusions investigators, information assurance professionals, and prospective lab examiners. Students learn basic technical concepts and the legal framework that guides the conduct of cyber investigations. Students also study special aspects of cyber case management (including online evidence collection) and subjects of cyber investigations. ICI contains five modules with module assignments and exercises and culminates with a final, graded exam.

Delivery: Online

Duration: 40 hours of training over 5 weeks

Prerequisite: None

ACE Recommendation

Scheduled Offering:

ICI-2402-OL (20 NOV – 22 DEC)

FY24 November Offerings

Introduction to Networks and Computer Hardware (INCH) OL/ILV

INCH is a 40-hour course that teaches computer basics, network theory, and input/output device identification and function. INCH is designed for personnel working in or interested in pursuing a career in fields such as computer intrusion investigations, information assurance, and digital evidence examinations. Students explore common operating system functionality and the use of the command line in Microsoft Windows. The course material and practical exercises introduce troubleshooting, as well as security and safety terminology and techniques. INCH contains 10 modules and culminates with a Capstone Exam.

Delivery: Online or Instructor-Led Virtual

Duration: Online is 40 hours of training over 4 weeks
Instructor-Led Virtual is 40 hours of training over 5 days

Prerequisite: None

IACET CEU-eligible, ACE Recommendation

Scheduled offerings:

INCH-2417-OL (27 NOV – 22 DEC)

INCH-2418-OL (27 NOV – 22 DEC)

Introduction to Networks and Computer Hardware In-Residence (INCH-RES)

INCH-RES is a 40-hour course that teaches computer basics, network theory, and input/output device identification and function. INCH-RES is designed for personnel working in or interested in pursuing a career in fields such as computer intrusion investigations, information assurance, and digital evidence examination. Students explore common operating system functionality and the use of the command line in Microsoft Windows. The course material and practical exercises introduce troubleshooting, security, and safety terminology and techniques, complete with the physical disassembly and reassembly of a computer. INCH-RES contains 10 modules and culminates in Capstone Exam. A test-out option is available to permit qualified personnel to bypass the course.

Delivery: In-residence

Duration: 40 hours of training over 1 week

Prerequisite: None

IACET CEU-eligible, ACE Recommendation

Scheduled offering:

INCH-RES-2403 (27 NOV – 2 DEC)

Please note that INCH Test Out options are available.

FY24 November Offerings

Introduction to Networks and Computer Hardware Test Out (INCH-TO)

Introduction to Networks and Computer Hardware Test Out (INCH Test-Out) provides students with the opportunity to demonstrate mastery of both the content knowledge portion of the course material in addition to a hands-on desktop computer tear down and rebuild. The content knowledge portion covers computer basics, network theory, and input/output device identification and function. Students must also demonstrate mastery of common operating system functionality and the use of the command line in Microsoft Windows. Students have three hours to complete this portion of the Test -Out. An additional 30 minutes of the test out requires students to complete the physical disassembly and reassembly of a desktop computer. Students must achieve a 70% or greater on both sections of the Test-Out to be eligible to register for the Cyber Incident Response Course (CIRC). If the student fails to successfully complete the INCH Test-Out, they will have the opportunity to request registration in the one-week INCH-RES course offered at a later date.

Delivery: In-residence

Duration: 3 hours over 1 day

Prerequisite: None

Schedule offering:

INCH-TESTOUT-2402 (17 OCT)

Network + (NET+)

NET+ is a bootcamp-style course that builds on your existing user-level knowledge and experience with computer operating systems and networks so you can master the fundamental skills and concepts needed for success in any networking career. Students are taught to describe the major networking technologies and systems of modern networks and configure, manage, and troubleshoot modern networks. Students must make their own arrangements to take the exam at any CompTIA testing center. Vouchers are not included.

Delivery: In-residence

Duration: Approximately 40 hours over 1 week

Prerequisite: None

Scheduled offerings:

NET+-2401 (13-18 NOV)

FY24 November Offerings

Network Intrusions Basics (NIB)

NIB is a 10-hour course that provides core knowledge needed to perform a network intrusion investigation. Students learn the language of intrusions and explore network fundamentals, including network architecture. The concepts presented in this course prepare students for additional network investigations courses. NIB contains two modules, each comprising two lessons, and a final, graded exam.

Delivery: Online asynchronous (Self-paced/no instructor)

Duration: Approximately 10 hours over 1 week

Prerequisite: None

Scheduled offerings:

NIB-2406-OL (6-12 NOV)

NIB-2407-OL (13-20 NOV)

NIB-2408-OL (20-27 NOV)

NIB-2409-OL (27 NOV – 4 DEC)

Network Traffic Collection (NTC)

NTC is a 40-hour course that prepares students to strategically place monitoring sensors in a network to capture traffic to and from a specific host. NTC is designed for Department of Defense (DOD), cyber-intrusions investigators, information assurance professionals, prospective lab examiners, and military intelligence and 5 counterintelligence personnel. Students examine how to evaluate a network, both physically and logically, to determine proper sensor placement. Students also study how to filter network traffic to comply with wiretap authority, hide the presence of the monitoring workstation on the network, and evaluate captured traffic for the proper content. NTC contains five modules and culminates with a final, graded exam.

Delivery: In-residence

Duration: Approximately 40 hours over 1 week

Prerequisite: None

Scheduled offering:

NTC-2402 (13-18 NOV)

NTC-2403 (27 NOV – 2 DEC)
