Cryptocurrency Activities (CCA)

Cryptocurrency Activities (CCA) is a 40-hour in-residence training course designed for law enforcement and counterintelligence professionals and provides students with an understanding of cryptocurrency fundamentals and the skills necessary to conduct investigations into cryptocurrency transactions. The course immerses students in scenario-based exercises that allow them to practice and reinforce what they have learned while using trusted resources. CCA culminates with a graded Final Exam.

Delivery: In-residence
Duration: 40 hours of training over 1 week
Prerequisite: None
Scheduled offering:
CCA-2501 (4-8 NOV)

Cyber Fundamentals 200 (CF200)

CF200 is an 80-hour course that serves as the second installment of a two-part curriculum to provide foundational cyber knowledge to cyberspace workforce elements and Department of Defense (DOD) personnel, whose duties include the protection of DOD information systems from unauthorized and/or illegal access. The course comprises three units with multiple lessons; each unit culminates in a unit milestone exam and the 2 course ends with a Capstone Exam. There is a test-out option available to permit qualified personnel to bypass the course.

Delivery: Online asynchronous (Self-paced/no instructor)
Duration: 80 hours of training over 3 weeks
Prerequisite: None
Scheduled offering:
CF200-2501-OL (4-22 NOV)

Cybersecurity Analyst (CySA+)

Cybersecurity Analyst (CySA+) is a bootcamp-style course that teaches incident detection, prevention, and response through continuous security monitoring for success in a high-stakes analysis. Students learn processes in security operations, vulnerability management, incident response and management, and how to apply best practices for reporting and communication. Vouchers are not included.

Delivery: In-residence
Duration: 40 hours of training over 1 week
Prerequisite: None
Scheduled Offering:
CySA+-2502 (18-22 NOV)

Introduction to Networks and Computer Hardware (INCH) OL/ILV

INCH is a 40-hour course that teaches computer basics, network theory, and input/output device identification and function. INCH is designed for personnel working in or interested in pursuing a career in fields such as computer intrusion investigations, information assurance, and digital evidence examinations. Students explore common operating system functionality and the use of the command line in Microsoft Windows. The course material and practical exercises introduce troubleshooting, as well as security and safety terminology and techniques. INCH contains 10 modules and culminates with a Capstone Exam.

Delivery: Online or Instructor-Led Virtual
Duration: Online is 40 hours of training over 4 weeks
Instructor-Led Virtual is 40 hours of training over 5 days
Prerequisite: None
IACET CEU-eligible, ACE Recommendation
Scheduled offerings:
INCH-2503-OL (25 NOV – 19 DEC)
INCH-2504-OL (25 NOV – 19 DEC)

Log Analysis (LA)

LA is a 50-hour course that provides a comprehensive understanding of log analysis techniques. LA is designed for cyber investigators or analysts interested in furthering their skills in determining the how, when, and where of a network intrusion through log file analysis and investigation. Students learn how to process logs from Windows and Linux operating systems, firewalls, intrusion detection systems, and web and email servers. Students learn how to assemble evidence found in logs to assist in tasks ranging from building a case to recognizing an intrusion. LA contains three modules comprising multiple lessons and culminates with a final, graded exam.

Delivery: Online
Duration: 50 hours of training over 5 weeks
Prerequisite: None
Scheduled offering:
LA-2501-OL (18 NOV – 5 DEC)

Linux Essentials (LXE)

Linux Essentials (LXE) is a 40-hour course that teaches core concepts and techniques of Linux system management and administration. LXE is designed for students who want to develop greater understanding of Linux or who conduct investigative and security activities associated with Linux environments. Students acquire intermediate Linux skills used in cyber investigation studies and real-world investigative and security tasks. The course prepares students to carry out functions and tasks relevant to any standard Linux environment. LXE contains nine lessons and culminates with a final, graded exam.

Delivery: Online
Duration: 40 hours of training over 4 weeks
Prerequisite: None
Scheduled offerings:
LXE-2501-OL (18 NOV – 12 DEC)

Network + (NET+)

NET+ is a bootcamp-style course that builds on your existing user-level knowledge and experience with computer operating systems and networks so you can master the fundamental skills and concepts needed for success in any networking career. Students are taught to describe the major networking technologies and systems of modern networks and configure, manage, and troubleshoot modern networks. Students must make their own arrangements to take the exam at any CompTIA testing center. Vouchers are not included.

Delivery: In-residence
Duration: Approximately 40 hours over 1 week
Prerequisite: None
Scheduled offering:
NET+-2502 (18-22 NOV)
