| | Prototype Quicktime screens | Prolifics |
| | Login.gov | LeAnn Potts |
| | Customer Forum | User Group Representatives |
| | New Action Items | Tina Montoya |
| | Wrap up | LeAnn Potts |

Action Items

1. (Complete) Jaime Robinson (BLM) indicated their employees were having issues with recording cost component information with the new Paid Parental Leave codes (PPL).

Response: This issue was due to unique coding in place for BLM and was fixed on April 19, 2021, allowing users to code cost components with PPL.

Action Items

2. (In Progress) Kathy Takacs (USGS) requested written instructions and a demo for Login.gov prior to implementation in the Quicktime production environments.

Response: IBC is finalizing the written instructions and will schedule the demo when a firm implementation date is set.

Action Items

3. (Complete) Mirna Minott (BSEE) stated she was having issues with locking time sheets when drilling down to a specific certifier.

Response: After testing the specific scenario, IBC was able to replicate the issue. DFCT0012175 was submitted and is scheduled for the Q21.02 release.

Action Items

4. (In Progress) Jaime Robinson (BLM) indicated some of their employees reported not being able to cancel their own approved leave requests.

Response: IBC conducted testing for this and was not able to replicate the issue. Jaime will share any future issues reported on specific employees for further testing.

Release Update Q21.02

- **ENHC0036068** – Creates a new export of current time sheet and accounting data, capturing time sheets in all statuses except released (REL). This export would transmit every ten minutes into an FPPS dataset to be accessed. Bureau of Reclamation (BOR) only.
- **ENHC0036178** – Expands current Fav Key field from 3 characters to accommodate up to 10 characters. Bureau of Reclamation (BOR) only.

Release Update Q21.02

- **ENHC0036192** – Adapts Quicktime to accommodate the BOR Cost key File and adjusts for component look up. Bureau of Reclamation (BOR) only.
- **ENHC0036195** – Upgrades existing Quicktime databases from Oracle 12C to Oracle 19C.

Release Update Q21.02

- **ENHC0036202** – Creates new hours code ‘EPL – Emergency Paid Leave-Used’ in accordance with the American Rescue Plan Act (ARPA) of 2021. This pay code establishes a new paid leave category for federal employees who may be eligible based on qualifying situations related to COVID-19.
- **ENHC0036213** – Creates an interim solution for the American Rescue Plan Act (ARPA) which allows users to record pay code 061 with an Emergency Paid Sick leave reason code to be sent with the timesheet. This was applied to production instances on May 5, 2021.

Release Update Q21.02

- **DFCT0012129** - Allows FPPS to push multiple data files to any Quicktime instance simultaneously without errors.
- **DFCT0012132** - Prevents employees with Pay Basis = PD from using the Paid Parental Leave pay codes.

Release Update Q21.02

- **DFCT0012159** - Allows text typed in the 'Additional Remarks' field to be saved on the 'Remarks' screen when the users 'Screen Reader Friendly' setting = Y in the employee profile.
- **DFCT0012175** – Enables the lock selection when an Administrator navigates to a specific Certifier in the 'Pay Period Status' functionality.

Release Update Q21.02

- **DFCT0012244** - Corrects an issue which prevented certifiers from taking the correct action on selected leave, extra hours, and telework requests from the 'Leave Request Summary' screen.

Enhancements Assigned to the Q21.03 Release

Currently there are two Enhancements scheduled for the Q21.03 release.

- **ENHC000036182** – Adds more detailed information to leave and extra hours request edit checks. The new wording will specify the days affected.
- **ENHC0036292** – Adapt the copy FAV key function to incorporate valid WOID values. Bureau of Reclamation (BOR) only.

FPPS Personnel Interface File (IFIL0073)

IBC is targeting the Q21.03 release to update the current functionality of the IFIL0073, FPPS personnel interface file.

Current Functionality:

- IFIL0073 runs bi-weekly in Quicktime after FPPS calculate.
- New users are created manually in Quicktime.

Functionality Changes:

- The IFIL0073 file will run nightly with all updates from completed actions in FPPS.
- All new employees will be created systematically from the personnel actions input in FPPS.

Login.gov

Login.gov has recently changed the model of their licensing. IBC management is determining the impact of the changes as they affect Quicktime.

An update will be provided as more information is received.
