

## **NEW CYBERSECURITY WORD SEARCH!**

CDSE has just released a new cybersecurity awareness word search, “Cyber Terminology!” This word search is not only fun, but gives you a clear understanding of the meaning of various cybersecurity terms. Besides, who doesn’t enjoy a good word search puzzle? Visit (<https://www.cdse.edu/multimedia/games/wordfind/cyber/game-01.html>) to check it out!

## **NEW CYBERSECURITY WEBCAST RELEASED**

Check out our new webcast, “Cybersecurity and Telework: Concerns, Challenges, and Practical Solutions – Part 1.” The webcast discusses Cybersecurity and remote working conditions and focuses on the challenges experienced as a result of this change. It also identifies common technologies used, attack vectors, and provides practical solutions. Access the webcast today! (<https://cdse.acms.com/cyber-aware2020-pt1/>).

## **NCSAM WEEK ONE**

The focus of National Cybersecurity Awareness Month’s first week is “If you Connect It, Protect It.” This emphasizes the potential vulnerability of all internet-connected devices.

Cybersecurity starts with YOU and is everyone’s responsibility. There are currently an estimated 4.8 billion Internet users—over 62% of the world’s population! This number will only grow, making the need to “Protect It” more important than ever.

Join us and get involved by increasing your awareness with the following resources:
