Full Report on Manufacturers' Shipments, Inventories and Orders March 2016

Summary. New orders for manufactured goods in March, up two of the last three months, increased \$5.0 billion or 1.1 percent to \$458.4 billion, the U.S. Census Bureau reported today. This followed a 1.9 percent February decrease. Shipments, up following eight consecutive monthly decreases, increased \$2.2 billion or 0.5 percent to \$464.7 billion. This followed a 0.8 percent February decrease. Unfilled orders, down three of the last four months, decreased \$1.2 billion or 0.1 percent to \$1,182.6 billion. This followed a 0.4 percent February decrease. The unfilled orders-to-shipments ratio was 7.01, down from 7.02 in February. Inventories, up following eight consecutive monthly decreases, increased \$1.1 billion or 0.2 percent to \$635.1 billion. This followed a 0.5 percent February decrease. The inventories-to-shipments ratio was 1.37, unchanged from February.

New Orders. New orders for manufactured durable goods in March, up two of the last three months, increased \$1.7 billion or 0.8 percent to \$230.6 billion, virtually unchanged from the previously published increase. This followed a 3.1 percent February decrease. Transportation equipment, also up two of the last three months, drove the increase, \$2.1 billion or 2.8 percent to \$75.8 billion. New orders for manufactured nondurable goods increased \$3.3 billion or 1.5 percent to \$227.8 billion.

Shipments. Shipments of manufactured durable goods in March, down three of the last four months, decreased \$1.1 billion or 0.5 percent to \$236.9 billion, virtually unchanged from the previously published decrease. This followed a 1.0 percent February decrease. Transportation equipment, also down three of the last four months, drove the decrease, \$1.5 billion or 1.9 percent to \$77.4 billion. Shipments of manufactured nondurable goods, up following eight consecutive monthly decreases, increased \$3.3 billion or 1.5 percent to \$227.8 billion. This followed a 0.6 percent February decrease. Petroleum and coal products, also up following eight consecutive monthly decreases, led the increase, \$2.8 billion or 8.0 percent to \$37.1 billion.

Unfilled Orders. Unfilled orders for manufactured durable goods in March, down three of the last four months, decreased \$1.2 billion or 0.1 percent to \$1,182.6 billion, virtually unchanged from the previously published decrease. This followed a 0.4 percent February decrease. Transportation equipment, down four consecutive months, drove the decrease, \$1.5 billion or 0.2 percent to \$787.3 billion.

Inventories. Inventories of manufactured durable goods in March, up following two consecutive monthly decreases, increased \$0.1 billion or virtually unchanged to \$394.2 billion. This was virtually unchanged from the previously published increase, and followed a 0.3 percent February decrease. Fabricated metal products, up following four consecutive monthly decreases, drove the increase, \$0.2 billion or 0.4 percent to \$48.5 billion. Inventories of manufactured nondurable goods, up following four consecutive monthly decreases, increased \$1.0 billion or 0.4 percent to \$240.8 billion. This followed a 0.7 percent February decrease. Petroleum and coal products, also up following four consecutive monthly decreases, led the increase, \$0.6 billion or 2.1 percent to \$29.2 billion. By stage of fabrication, March materials and supplies increased 0.3 percent in durable goods and increased 1.1 percent in nondurable goods. Work in process increased 0.2 percent in durable goods and decreased 0.4 percent in nondurable goods. Finished goods decreased 0.4 percent in durable goods and increased 0.3 percent in nondurable goods.

Figures in text are adjusted for seasonality, but not for inflation. Figures on new and unfilled orders exclude data for semiconductor manufacturing. For data, call (301) 763-4673 or go to www.census.gov/m3.

The Advance Report on durable goods for April is scheduled for release on May 26, 2016 at 8:30 a.m. EDT and the Full Report on June 3, 2016 at 10:00 a.m. EDT. See back page for survey description.

To receive the latest updates on the Nation's key economic indicators, download the America's Economy app for Apple and Android smartphones and tablets. To learn more about this release and the other indicators the U.S. Census Bureau publishes, join us for the Investigating Economic Indicators Webinar Series. For more information, visit www.census.gov/econ/webinar.

"Virtually unchanged" indicates that the change is less than 0.05 percent for a percent increase or decrease.

Table 1. Value of Manufacturers' Shipments for Industry Groups¹**[Estimates are shown in millions of dollars and are based on data from the Manufacturers' Shipments, Inventories, and Orders Survey.]**

^p Preliminary^f Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes. See note at end of Table 2 relating to survey error and revision.

² Estimates and percent changes of shipments for the semiconductor industry are included in computers and electronic products, and all other applicable aggregate totals.

Table 2. Value of Manufacturers' New Orders for Industry Groups¹

[Estimates are shown in millions of dollars and are based on data from the Manufacturers' Shipments, Inventories, and Orders Survey.]

^p Preliminary^f Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Data on new orders are not available for the semiconductor industry. Estimates and percent changes for new orders exclude semiconductor industry data.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <<http://www.census.gov/manufacturing/m3/>>.

^p Preliminary^f Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Estimates of inventories for the semiconductor industry data are included in computers and electronic products, and all other applicable aggregate totals.

See note at end of Table 2 relating to survey error and revision.

Table 5. Value of Manufacturers' Shipments, New Orders, Unfilled Orders, and Total Inventories for Topical Series^{1,2}

[Estimates are shown in millions of dollars and are based on data from the Manufacturers' Shipments, Inventories, and Orders Survey.]

P Preliminary

^r Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Topical series are regroupings of the separate industry categories.

³ Nondefense capital goods industries include: small arms and ordnance; farm machinery and equipment; construction machinery; mining, oil, and gas field machinery; industrial machinery; vending, laundry, and other machinery; photographic equipment; metalworking machinery; turbines and generators; other power transmission equipment; pumps and compressors; material handling equipment; all other machinery; electronic computers; computer storage devices; other computer peripheral equipment; communications equipment; search and navigation equipment; electromedical, measuring, and control instruments; electrical equipment; other electrical equipment, appliances, and components; heavy duty trucks; aircraft; railroad rolling stock; ships and boats; office and institutional furniture; and medical equipment and supplies.

⁴ Defense capital goods industries include: small arms and ordnance; communications equipment; aircraft; missiles, space vehicles, and parts; ships and boats; and search and navigation equipment.

⁵ Estimates and percent changes exclude semiconductor industry data.

⁶ Based on year-to-date for shipments and new orders, but on same month prior year for unfilled orders and inventories.

See note at end of Table 2 relating to survey error and revision.

Table 6. Value of Manufacturers' Inventories, by Stage of Fabrication, by Industry Group¹

[Estimates are shown in millions of dollars and are based on data from the Manufacturers' Shipments, Inventories, and Orders Survey.]

^p Preliminary^f Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

See note at end of Table 2 relating to survey error and revisions.

^p Preliminary

^r Revised data due to late receipts and concurrent seasonal adjustment.

² Excludes the following industries with no unfilled orders: Wood products; nonmetallic mineral products; medical equipment and supplies; office supplies; other miscellaneous manufacturing; cutlery and handtools; farm and garden machinery; computer storage and peripheral devices; audio and video equipment; manufacturing and reproducing magnetic and optical media; batteries; automobiles; light trucks and utility vehicles; heavy duty trucks; and miscellaneous furniture.

³ Unfilled orders to shipments ratio excludes semiconductor manufacturing.

Survey Description

This report is compiled from results of the U.S. Census Bureau's Manufacturers' Shipments, Inventories, and Orders (M3) survey, which is a voluntary survey authorized by Title 13 of the United States Code. This survey provides statistics on a calendar-month basis for manufacturers' value of shipments, new orders (net of cancellations), end-of-month order backlog (unfilled orders), end-of-month total inventory (at current cost or market value), and inventories by stage of fabrication (materials and supplies, work-in-process, and finished goods). Data published from the M3 survey are based on a panel of approximately 4,800 reporting units that represent approximately 3,000 companies and provide an indication of month-to-month change for the Manufacturing Sector. These reporting units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers in 92 industry categories, which are combined into 65 publication levels due to the small monthly panel size. The survey methodology assumes that the month-to-month changes of the total operations of the reporting units in the M3 panel effectively represent the month-to-month movements of all establishments that make up the category.

The companies for which shipments data are currently reported or imputed in the M3 survey represent approximately 61 percent of the total value of shipments for manufacturing establishments in the 2012 Economic Census, and these companies include almost two-thirds of the manufacturing companies with \$500 million or more in shipments in the 2012 Economic Census. The companies for which shipments data are currently reported in the M3 survey represent approximately 54 percent of the total value of shipments for manufacturing establishments in the 2012 Economic Census. Statistics based on the M3 panel differ from the results that would be obtained from a complete enumeration of all manufacturing companies. The M3 panel is not based on a probability sample; therefore, the sampling errors that are normally provided with sample surveys cannot be measured. Nonsampling errors are attributable to many sources. The use of company or divisional reports to estimate the monthly change for establishments is one source of nonsampling error. The use of primarily large companies to represent the month-to-month movement of all companies is another potential source. Any corrections will be published in the full report. Corrections received after the full report will be released in the next month's advance report. Any revisions made later than two months will be reflected in the annual benchmark publication.

Additional survey documentation can be found on our web site: <http://www.census.gov/m3>.

Benchmark notice

Revised historical data from the Manufacturers' Shipments, Inventories, and Orders (M3) Survey will be issued on May 18, 2016. These revisions result from:

- benchmarking the 2008-2011 Annual Survey of Manufactures (ASM) shipments and inventories data to the revised 2012 Economic Census data on a 2007 North American Industry Classification System (NAICS) basis;
- benchmarking the M3 shipments and inventories data to the 2014 ASM and revised 2013 ASM data, as well as the revised 2012 Economic Census data, on a 2012 NAICS basis, and ASM benchmarks for prior years on a 2007 NAICS basis;
- incorporating the unfilled orders to shipments ratios obtained from the 2014/2013 Manufacturers' Unfilled Orders (M3UFO) Survey by applying these ratios to the respective ASM shipments data, as well as incorporating revised unfilled orders to shipments ratios for prior years by applying them to the respective Census or ASM shipments data;
- adjusting the new orders data to be consistent with the benchmarked shipments and unfilled orders data;
- correcting monthly data for late receipts, reclassifications of reported data, and revisions to previously reported data;
- updating the seasonally adjusted data based on the results of benchmarking and the recent annual review of the seasonal adjustment models.

These revisions will span the seasonally adjusted data for January 1997 through March 2016 and the data not seasonally adjusted for January 2001 through March 2016. An updated Press Release will contain revised monthly tables for January 2016 through March 2016. Please call M3 staff on (301) 763-4832 with any questions.
