**NEW RESIDENTIAL CONSTRUCTION IN OCTOBER 2016**

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for October 2016:

**BUILDING PERMITS**

Privately-owned housing units authorized by building permits in October were at a seasonally adjusted annual rate of 1,229,000. This is 0.3 percent ( $\pm 2.0\%$ )\* above the revised September rate of 1,225,000 and is 4.6 percent ( $\pm 1.4\%$ ) above the October 2015 estimate of 1,175,000.

Single-family authorizations in October were at a rate of 762,000; this is 2.7 percent ( $\pm 1.4\%$ ) above the revised September figure of 742,000. Authorizations of units in buildings with five units or more were at a rate of 439,000 in October.

**HOUSING STARTS**

Privately-owned housing starts in October were at a seasonally adjusted annual rate of 1,323,000. This is 25.5 percent ( $\pm 12.6\%$ ) above the revised September estimate of 1,054,000 and is 23.3 percent ( $\pm 14.4\%$ ) above the October 2015 rate of 1,073,000.

Single-family housing starts in October were at a rate of 869,000; this is 10.7 percent ( $\pm 10.2\%$ ) above the revised September figure of 785,000. The October rate for units in buildings with five units or more was 445,000.

**HOUSING COMPLETIONS**

Privately-owned housing completions in October were at a seasonally adjusted annual rate of 1,055,000. This is 5.5 percent ( $\pm 10.1\%$ )\* above the revised September estimate of 1,000,000 and is 7.2 percent ( $\pm 12.3\%$ )\* above the October 2015 rate of 984,000.

Single-family housing completions in October were at a rate of 749,000; this is 3.9 percent ( $\pm 11.3\%$ )\* above the revised September rate of 721,000. The October rate for units in buildings with five units or more was 300,000.

***New Residential Construction data for November 2016 will be released on Friday, December 16, 2016, at 8:30 A.M. EST.***

**EXPLANATORY NOTES**

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 6 months for total starts, and 6 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ( $\pm 3.2\%$ ) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised two percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

\* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
