

FOR RELEASE AT 10:00 AM EDT, THURSDAY, MARCH 23, 2017

MONTHLY NEW RESIDENTIAL SALES, FEBRUARY 2017

Release Number: CB17-43

March 23, 2017 - The U.S. Census Bureau and the U.S. Department of Housing and Urban Development jointly announced the following new residential sales statistics for February 2017:

 NEW RESIDENTIAL SALES FEBRUARY 2017	
New Houses Sold¹:	592,000
New Houses For Sale²:	266,000
Median Sales Price:	\$296,200
Next Release: April 25, 2017	
¹ Seasonally Adjusted Annual Rates	
² Seasonally Adjusted	
Source: U.S. Census Bureau, HUD, March 23, 2017	

New Home Sales

Sales of new single-family houses in February 2017 were at a seasonally adjusted annual rate of 592,000, according to estimates released jointly today by the U.S. Census Bureau and the Department of Housing and Urban Development. This is 6.1 percent (± 17.3 percent)* above the revised January rate of 558,000 and is 12.8 percent (± 18.0 percent)* above the February 2016 estimate of 525,000.

Sales Price

The median sales price of new houses sold in February 2017 was \$296,200. The average sales price was \$390,400.

For Sale Inventory and Months' Supply

The seasonally-adjusted estimate of new houses for sale at the end of February was 266,000. This represents a supply of 5.4 months at the current sales rate.

The March report is scheduled for release on April 25, 2017. View the full schedule in the Economic Briefing Room: www.census.gov/economic-indicators/. The full text and tables for this release can be found at www.census.gov/construction/nrs/.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take three months to establish an underlying trend for building permit authorizations, six months for total starts, and six months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as “2.5 percent (± 3.2 percent) above” appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percentage change is likely to have occurred. All ranges given for percentage changes are 90 percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percentage changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised 3 percent or less. Explanations of confidence intervals and sampling variability can be found on our website. www.census.gov/construction/nrc/how_the_data_are_collected/

America’s Economy Mobile App

The America’s Economy app provides real-time updates for 19 key economic indicators released from the Census Bureau, Bureau of Labor Statistics, and Bureau of Economic Analysis.

www.census.gov/mobile/economy/

API

The Census Bureau’s application programming interface lets developers create custom apps to reach new users and makes key demographic, socio-economic and housing statistics more accessible than ever before.

www.census.gov/developers/

-X-

* The 90 percent confidence interval includes zero. In such cases, there is insufficient statistical evidence to conclude that the actual change is different from zero.
