

LinkedIn Learning Available to the Federal Acquisition Workforce

Members of the federal acquisition workforce now have free access to more than 8,000 LinkedIn Learning assets through the FAI CSOD virtual campus.

These learning assets include guides, courses, books, and videos that provide a new opportunity to expand skills, take new training, and earn continuous learning points (CLP). Users can search for training by topic in FAI CSOD or filter by provider to see LinkedIn Learning courses, which include a variety of topics.

The new courses integrate seamlessly into the existing environment. After a user registers for a course, the course will appear in their active FAI CSOD transcript. From then on, one can find the course in their active transcript until completion, just like any other course in the virtual campus. LinkedIn Learning provides a wide range of options, including courses on business, innovation, leadership skills, and supply chains.

Below are some FAQs about LinkedIn Learning:

My agency does not offer LinkedIn Learning licenses. How will the members of my agency who have an FAI CSOD account complete LinkedIn Learning courses?

By logging into FAI CSOD, users can access LinkedIn Learning licenses that FAI purchased for federal acquisition workforce members. If your agency does not have LinkedIn Learning, they can use these licenses.

How do my workforce members get access to LinkedIn Learning in FAI CSOD?

They already have access! Users can search for acquisition-related training topics in FAI CSOD. They simply need to click on a LinkedIn Learning course to activate the course.

My agency purchased LinkedIn Learning for our workforce, should they use FAI licenses?

We encourage workforce members who have an agency LinkedIn Learning license to use that license.

If my agency purchased LinkedIn Learning for our workforce, will the training courses they complete in the agency LinkedIn Learning automatically transfer to their FAI CSOD profile?

No, these are two different LinkedIn Learning accounts. It is not possible to link the accounts at this time. However, users can submit an external continuous learning activity request to have the training they completed in their agency LinkedIn Learning account be added to their FAI CSOD transcript.

How many CLPs are granted for LinkedIn Learning courses completed?

CLPs are granted for LinkedIn Learning courses that meet the requirements for CLPs. Some micro-learning assets (less than 30 minutes) and/or learning assets that don't have an assessment have a zero CLP value.

How can I tell what courses in FAI CSOD are LinkedIn Learning courses?

The provider for the course will say "LinkedIn Learning." LinkedIn Learning courses also appear as an "Online Class" within FAI CSOD.
