DEFINITIONS OF KEY TERMS

Table Number	Field	Key Terms Requiring Definitions
A.1	Program Capacity	<p>New Household: A household, including a pregnant woman, female caregiver, and/or male caregiver who signs up to participate in the home visiting program at any time during the reporting period and continues enrollment during the reporting period. The household may include multiple caregivers depending on model-specific definitions.</p> <p>Continuing Household: A household, including a pregnant woman, female caregiver, and/or male caregiver who were signed up and actively enrolled in the home visiting program prior to the beginning of the reporting period and continues enrollment during the reporting period. The household may include multiple caregivers depending on model-specific definitions.</p> <p>Current Caseload: The number of households actively enrolled at the end of the quarterly reporting period. All members of one household represent a single caseload slot.</p> <p>Maximum Service Capacity: The highest number of households that could potentially be enrolled at the end of the quarterly reporting period if the program were operating with a full complement of hired and trained home visitors</p> <p>Note: The maximum service capacity is equivalent to the caseload of family slots approved by HRSA</p> <p>Caseload of Family Slots: The highest number of families (or households) that could potentially be enrolled at any given time if the program were operating with a full complement of hired and trained home visitors. Family slots are those enrollment slots identified as MIECHV in accordance with the identified enrollment method of the awardee. For more information on the definition of a MIECHV family slot see the FY 2108 MIECHV Notice of Funding Opportunity Announcement. All members of one family or household represent a single caseload slot. The count of slots should be distinguished from the cumulative number of enrolled families during the grant period. It is known that the caseload of family slots may vary by federal fiscal year pending variation in available funding in each fiscal year. Applicants should remember that inability to meet proposed caseloads may result in deobligated funds, which may impact future funding.</p> <p>Capacity Percentage: Capacity percentage is a calculated indicator that results from dividing the current caseload by the maximum service capacity and multiplying by 100.</p>
A.3	Family Engagement	<p>Currently Receiving Services: The number of households currently receiving services refers to households that are participating in services at the end of the reporting period.</p> <p>Completed Program: The number of households who completed the program refers to households who have completed the program or transitioned to another program according to home visiting model-specific definitions and criteria during the reporting period.</p> <p>Stopped Services Before Completion: The number of households who stopped services before completion refers to households who left the program for any reason prior to completion.
