Understanding the Report

After the EIV SAVE report has been retrieved, there are several columns of data as well as drop-down filters that allow the user to filter the data contained in the report. The focus of the report are the two columns to the far right, titled “Citizenship” and “SAVE Initial Verification Status.” The data that appears in the “Citizenship” column is information that the PHA provided to HUD through IMS-PIC from the Form HUD-50058 (line 3i) submission as shown below in the report screenshot.

The next column of interest is the “SAVE Initial Verification Status” column. This column lists the immigration verification response that HUD received from the U.S. Customs and Immigration Service’s (USCIS) Systematic Alien Verification for Entitlements (SAVE) system. This initial verification response indicates that the individual that is listed in the record may either be ineligible to receive HUD assistance or that additional information is needed to determine the individual’s immigration status. Since PHAs are required to obtain the information necessary to determine eligibility for HUD housing assistance programs prior to admitting an individual, additional verification should already be documented in the
