

Opportunities for U.S. Agricultural Technologies in the Indian Market Webinar

Are you interested in India's Agribusiness market?

Precision farming, big data, and sustainable agriculture are transforming the agricultural landscape in India. With 52% of its land arable, there are lots of opportunities.

Participants in this webinar will learn:

- how to take advantage of the business opportunities being created by this transformation,
- best ways to navigate the market challenges,
- about the policies (i.e., mechanization, precision irrigation, increased allocation of funds) the Central Government has drafted to double farmer's incomes in 5 years.

Speakers:

- Padmanand V, Executive Director, Grant Thornton India LLP
- Rohtash Mal, CEO, EM3 Agri Services
- Andrew Edlefsen, Commercial Officer, U.S. Commercial Service, Delhi, India

Commercial Service India:

New Delhi
 Mumbai
 Chennai
 Kolkata
 Ahmedabad
 Bengaluru
 Hyderabad
