

Opportunities for U.S. Companies in China's Growing LNG Market

China's LNG ISO Container Market Potential

Due to economic expansion and shifting government policy towards cleaner fuel sources, China's demand for LNG imports has increased significantly and could represent new LNG export opportunities for U.S. companies. However, as of today, both China and the U.S. lack the significant infrastructure needed to fully utilize these large-scale opportunities. Join us and industry experts for a discussion on China's LNG market and the next steps for finding Chinese partners.

LNG ISO containers have the potential to:

- Bridge the infrastructure gaps and facilitate more flexible LNG trade between the U.S. and China.
- Open the LNG market to small- and mid-sized U.S. companies.
- Ease import restrictions caused by lack of storage facilities.
- Reduce dependency on terminals and give companies the ability to reach new customers far away from established pipelines.

Topics & Speakers:

- **China LNG Market for ISO Containers**
Speaker: Peter Han, Senior Partner
Resonance Energy Consulting
- **Case Study on Importing LNG to China via ISO Container**
Speaker: Justin Zhou, Manager, Strategic Management
Sinochem JN Energy
- **2018 U.S.-China Oil & Gas Industry Forum, Houston, TX**
Speaker: Victoria Yue, Oil/Gas Trade Specialist
U.S. Department of Commerce
