

“During the 13th Five-Year Plan period (2016-2020) , the average annual growth rate of environmental protection industry is estimated to exceed 15%. By the year of 2020, energy conservation and environmental protection industry is expected to become the pillar industry of the national economy.”

—— China Environmental Protection Industry Development Report 2018

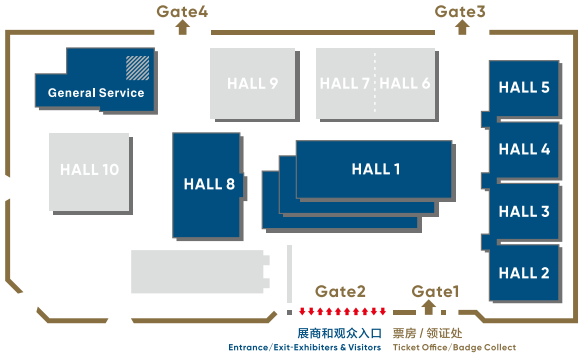

CIEPEC2019
Fighting against Pollution

National Conference on Ecological and Environmental Protection has proposed to fight for pollution prevention and control. CIEPEC2019 will provide cutting-edge solutions for the seven iconic battles against environmental pollution: blue sky, diesel truck pollution control, urban black and smelly water treatment, comprehensive treatment in Bohai Sea, protection and restoration of Yangtze River, water source protection and treatment of agricultural and rural pollution.

Exhibits Range

CIEPEC demonstrates key enterprises with advanced technologies, gives full play to the technical promotion role of the exhibition platform and leads the technological progress.

Exhibits range:

- Water pollution control technology and equipment
- Air pollution control technology and equipment
- Solid waste disposal technology and equipment
- Soil and groundwater remediation technology and equipment
- Noise and vibration control technology and equipment
- Ecological remediation and protection technology and equipment
- Energy conservation technology and equipment
- Environmental monitoring
- Environmental service
- Indoor environment control and health
- Ecological and environmental protection industrial park

Customized Service

To make valuable connections, CAEPI will provide business matching services for the special booth exhibitors.

Professional Visitors

Thanks to its unique brand effect, CIEPEC can not only gather excellent environmental enterprises at home and abroad, but also attract high-quality visitors from the government, leading enterprises and industry users.

- Professional visiting groups organized by local environmental departments
- Clients in various industrial sectors and key enterprises under environmental supervision
- Academies, universities and financial institutions
- Professionals in environmental industry
- Foreign government departments, environmental agencies and enterprises
