On February 1st, 2020, the Ministry of Industry, Trade, Green and Digital Economy of Morocco under the law 24-09 on the security of goods and services, outsourced the control of export of industrial products to the Kingdom of Morocco. The Government established a transitional application period from February 1<sup>st</sup>, 2020 to June 20<sup>th</sup>, 2020, during which time the Certificate of Compliance was voluntary. As of today, the issuance of the certificate is mandatory for any company wishing to export into Morocco and **Applus Fomento Contrôle** is one of the companies authorized to issue the Certificate of Conformity (CoC) required by this Program.

This webinar organized by Applus Fomento Contrôle in collaboration with the **U.S. Commercial Service in Morocco** aims to address the exporter's questions concerning the program and the new regulation.

The regulation divides the products subject to inspection into two lists: 80% of the products are inspected at origin and the remaining 20% are inspected at destination. Exporters are classified in three routes, depending on the route it will consist of a documentary verification, physical inspection, and laboratory tests.
