

Rail Guided Vehicles (RGV)

A company in Tel Aviv is seeking U.S. manufacturers/integrators of Rail Guided Vehicles (RGV). The RGVs will be components of a large-scale outdoor material handling system.

The potential project is in feasibility study stage, and is comprised of an outdoor system to transfer 4-6 tons of products between 15 different warehouses across approximately 6 miles. The company is considering a loop rail with 15 exits/entrances and electrical RGV/RGC (Rail Guided Vehicle/Cart).

The company will give preference to a US manufacturer of RGV/RGC or a System Integrator that can provide a turn-key solution.

The company specializes in importing, marketing and servicing a wide range of electro-mechanical equipment and Ground Support Equipment (G.S.E.) manufactured by leading worldwide companies, which the company exclusively represents. Customers of the company include the Israeli Ministry of Defense, the Israeli Defense Forces, the Israeli Air Force and Navy, Israel Airports Authority, military industries, airline companies, and other industrial and private enterprises.

There is no deadline to express interest at this stage (March 2021).
