

Air Pollution Control and Decarbonization Needs and Opportunities in India's Steel Industry Webinar

The U.S. Commercial Service invites you to join a webinar to learn about India's steel sector decarbonization needs and challenges. Hear from Indian steel producers about the country's decarbonization goals and needs for mitigating greenhouse gas emissions.

This webinar will provide information on air pollution control and decarbonization opportunities and challenges in India's steel sector. Some of India's leading steel manufacturers, such as ArcelorMittal Nippon Steel and Jindal Steel & Power will discuss their plans to meet India's decarbonization goals and focus specifically on their challenges and needs for mitigating greenhouse gas emissions. The webinar is geared toward U.S. solutions providers who will also hear from U.S. Government representatives as well as the Institute of Clean Air Companies (ICAC) and their perspectives on decarbonizing technologies and services that the U.S. steel industry utilizes.

Featured Speakers:

- Ms. Aileen Nandi, Minister Counselor for Commercial Affairs, U.S. Embassy, New Delhi
- Institute of Clean Air Companies (ICAC)
- Mr. Atanu Mukherjee, President & Chief Executive Officer, Dastur Energy
- ArcelorMittal Nippon Steel
- Jindal Steel & Power
- Bengal Chamber of Commerce

**In collaboration with the Institute of Clean Air Companies
and Bengal Chamber of Commerce**
