SLOW THE SPREAD OF COVID-19

COVID-19 Testing is Available **in Fairfax** *& surrounding jurisdictions*

1 CHECK FOR SYMPTOMS

The most common symptoms of COVID-19 are fever of >100.4F cough, shortness of breath or difficulty breathing.

Other symptoms may include chills, repeated shaking with chills, muscle pain, headache, sore throat or new loss of taste or smell.

If you have danger signs, such as trouble breathing, pain or pressure in chest, confusion or inability to arouse, or bluish lips or face, call 911.

Anyone experiencing symptoms without danger signs, especially those who are over 65 years old, pregnant, have a serious medical condition, like diabetes, or are in another high-risk category, **continue to step 2.**

Most people who get COVID-19 recover on their own at home. If you have a positive test for COVID-19, or have not been tested and have symptoms of respiratory illness, stay home and avoid contact with others; wear a face covering when around others; wash hands frequently; disinfect surfaces regularly; and inform close contacts you are sick. Go to fairfaxcounty.gov/covid19 "slow the spread of COVID-19 toolkit."

2 CALL FIRST

If you don't have a doctor or if you don't have insurance, call one of the clinics listed in this document.

The doctor or clinic will make an appointment for you to be screened in person or online. To protect others, do not visit your doctor or clinic without calling ahead first.

3 GET SCREENED

If you are screened online and need a test, the doctor or clinic will schedule an appointment for you or refer you to a testing site.

If you are screened in person, and the doctor determines you need a test, the doctor or clinic will collect a test sample if they are equipped as a testing site, or they will refer you to a **testing site.**

If you are screened in person, and the doctor determines you don't have COVID-19, follow your doctor's guidance.

The CDC recommends COVID-19 testing for the following: hospitalized patients; symptomatic healthcare facility workers; symptomatic residents of long-term care facilities or other congregate living settings; persons with symptoms of COVID-19; or persons without symptoms prioritized by their clinicians for public health monitoring & surveillance. **Many testing sites require pre-screening, a doctor's order and most require appointments.**

4 GIVE A SAMPLE

The best test for COVID-19 infection involves taking a swab of the nose or mouth. Your healthcare worker will take this specimen while wearing personal protective equipment (PPE) like goggles, masks or respirators, gowns and gloves. The swab will be sealed and sent to a laboratory for testing.

5 RECEIVE RESULTS

You will be notified when the results are available.

While waiting for results, it's important that you stay home and stay away from others and wear a cloth face covering when social distancing is difficult.

If you have COVID-19, you will receive further guidance to help protect yourself and others and to identify your close contacts.

fairfaxcounty.gov/health/novel-coronavirus

For questions about COVID-19, call the Health Department call center at **703-267-3511,** 9am-7pm weekdays; 9:30am-5pm weekends.
The Fairfax County Health Department does not provide COVID-19 diagnosis or testing.
