

High School Student Volunteers Needed For Haycock Science Club 2020-21

Haycock Science Club is looking for High School student volunteers

Enthusiastic high school student volunteers are needed to run virtual sessions for Science Olympiad topics to Elementary School students in grades 3 through 5. These online sessions start from November 2nd, 2020.

We would prefer to have 2 high schoolers working as partners for each session. Most of the topics for 4th and 5th grades are the same and we welcome the same partners to deliver for both grade sessions if possible.

Sign up to volunteer
