

# CURIOSITY

"When you're curious, you find lots of interesting things to do."  
-Walt Disney

## WHAT DOES CURIOSITY MEAN?

You like to explore and discover new things. You ask lots of questions because you want to learn more about anything and everything.

## WHY DOES THIS MATTER?

Curiosity is in all of us. It opens up our minds to new ideas. When you explore something new, like observing how a caterpillar moves or eats, you are using your curiosity to learn!
