Itinerary

Date	Theme	Description
4/14 (Monday)	Chemistry	Get ready for fizzy reactions, secret messages, and stretchy slime as we explore the fun side of chemistry!
4/15 (Tuesday)	Physics	From rocket launches to electrifying experiments, discover the forces that shape our world!
4/16 (Wednesday)	Biology	Extract DNA, test water's hidden powers, and dive into biology, anatomy, and statistics in a hands-on way!
4/17 (Thursday)	Computer Science	Learn how computers think, try coding, and explore the world of AI and chatbots in this interactive tech day!
4/18 (Friday)	Engineering	Experiment with airplanes, bridges, and CAD modeling as we bring engineering ideas to life!

Join us for a week of hands-on STEM adventures, where kids will explore chemistry, physics, biology, computer science, and engineering through exciting experiments, creative challenges, and interactive learning!
