

## **Distance Learning Math Course for Water Treatment Operators Using the ABC Water Treatment Formula Table**

Virginia Western Community College (Federal ID# 54-1268273) offers “Using the ABC Water Treatment Formula Table”, a math course for water treatment operators, during the spring semester from March to April. The course is intended to familiarize operators with the ABC formula table, used for the closed-book state certification examinations, and the treatment processes associated with each formula. The course is offered online only, by real time webcast on 6 consecutive Monday evenings from 6-9 pm. Webcast participation is not mandatory; webcasts are recorded for student access at other times. Course requires an investment of 18 hours, consisting of participation in the webcasts, review of online resource materials and webcast recordings, completion of weekly Practice Assignments, and one 3-hour proctored Practice Exam at the conclusion of the course, taken at your place of employment or at a nearby community college testing center. 18 CPEs are awarded upon successful completion, based on Practice Assignment submissions and Practice Exam grade. Cost is \$85. All resource materials required for the course are provided on-line at no additional cost. Class size is limited to 6 to 12 students. Operators may take the course more than once; however, a certificate of successful completion will be provided only once. For more information, contact course instructor Robert Canova, Adjunct Instructor and VA AWWA Life Member, at [rcanova@viriniawestern.edu](mailto:rcanova@viriniawestern.edu).
