

Help Me Grow Washington is a **FREE** service that connects parents and caregivers to resources in their community.

Free support for Early Childhood Education Providers

Help Me Grow Washington connects families with services they need and supports your role in early childhood development. In addition to developmental screening tools and referral support, Help Me Grow offers a range of free services to help families navigate parenting challenges, access basic needs, and connect to local resources.

How do we help?

Early childhood education providers are often the first to notice when a child might need extra support. We help make sure you're not doing that alone. When you partner with us, you get:

- **Free access to ASQ Online**, along with tailored training and support to make sharing and managing screenings easier for you and your families.
- Support interpreting **ASQ results**
- Guidance on talking with families about **screening results**
- Direct referrals to **local child development resources** and materials for families in **multiple languages**
- **Training for your staff** in developmental milestones, screening, and referral processes

Why partner with us?

We offer tools and support so you can easily track development, start important conversations with families, and connect them to services when needed.

Let's Work Together

Partnering with Help Me Grow is free, and getting started is simple. If you're ready to:

- Offer developmental screening with confidence
- Connect families with the right services at the right time
- Strengthen your program's impact with trusted support
