First applicant review will occur on 8/28/20, position will be open until filled.

Description:

The COVID in Pregnancy Expanded Surveillance (CIPES) project is a new activity structured around state-level implementation of the CDC COVID reporting pregnancy module. The goal of this project is to establish expanded surveillance to identify and describe the effects of SARS-CoV-2 infection across the course of pregnancy through delivery; and use this information to develop programs and activities that prevent adverse SARS-CoV-2 outcomes from the pre- and perinatal periods. This project will build on COVID-19 case investigation and contact tracing activities, leveraging disease reporting information infrastructure.

The successful candidate for this position will have some project management/coordination experience, experience with medical chart abstractions, experience linking large datasets, and ideally experience working with RedCap. Project activities will include hiring and training chart abstractors, building or working with another epidemiologist to build data collection instruments in RedCap, overseeing data collection and data entry quality by chart abstractors, implementing sampling frameworks, and collaborating with epidemiologists to establish linkage to birth and fetal death records. This position will be primarily responsible for the success of this project, including data transmission to CDC, healthcare provider outreach, and analysis and reporting related to the risks of SARS-CoV-2 infection in pregnancy and at delivery.

Required Qualifications

- A Master’s degree or higher in epidemiology; OR a Master’s degree or higher in public health or a closely allied field including 12 graduate quarter hours or equivalent (500 level or above) in epidemiology and 12 graduate quarter hours or equivalent in biostatistics.
  
  AND

- Two (2) or more years of experience working in a public health agency or a similar setting.

The Washington State Department of Health (DOH) is an equal opportunity employer. DOH strives to create a working environment that is inclusive and respectful. It is our policy to prohibit discrimination on the basis of race, sex, color, national origin, religion, sexual orientation, gender identity, age, veteran status, political affiliation, genetics, or disability in the recruitment, selection, and hiring of our workforce.
