

# Infection Prevention and Control Services

The COVID-19 pandemic revealed a critical need for comprehensive Infection Prevention and Control programs across the health care spectrum. By working diligently to protect both our patients and our providers from the spread of infectious disease, we create care environments that are safe from infection.

Comagine Health's education and consultation services for Infection Prevention and Control help mitigate costs, protect staff and vulnerable patient populations and create a standardized, evidence-based approach to preventing the spread of disease. By working together, we can also address potential disparities within disadvantaged populations. We strive to:

- Teach best practices in infection prevention, outbreak management and safety for provider homes and organizations
- Prepare teams to address infection prevention and control (IPC) needs of their residents/clients, from COVID-19 to other common infections
- Protect everyone from infection, strengthen knowledge of foundational practices and learn timely strategies to apply principles in day-to-day tasks
- Build staff confidence in their work, feel safe from infection and support staff retention and emotional health
- Create opportunities for peer-to-peer learning and community collaboration

---

**Comagine Health has provided infection prevention and control training and technical assistance to more than 2,000 direct care workers and their employers.**

---

## Our Services:

### Infection Prevention 101: The Building Blocks

- Interactive virtual training and education sessions facilitated by infection prevention and control (IPC) experts
- Real-time, one-on-one consultation with infection prevention advisors (registered nurses)
- Access to recorded training sessions and frequently asked questions (FAQs)
- Access to an online library of self-paced education sessions, resources and tools

### Professional Development of Direct Care Workers

- Robust assessments to identify appropriate certifications for infection prevention among direct care workers
- Coaching and mentoring to prepare direct care workers for certification and testing for infection prevention

## **Quality Improvement and Quality Assurance**

- Neutral convening and relationship building among various stakeholders, including regulatory agencies
- Opportunities for peer to peer sharing and collaboration through ECHO-inspired learning sessions

In addition, our educational material meet the Centers for Disease Control and Prevention standards and guidelines for quality training.

## **About Comagine Health**

Comagine Health is a national, nonprofit, health care consulting firm. We work collaboratively with patients, providers, payers and other stakeholders to reimagine, redesign and implement sustainable improvements in the health care system.

As a trusted, neutral party, we work in our communities to address key, complex health and health care delivery problems. In all our engagements and initiatives, we draw upon our expertise in quality improvement, care management, health information technology, analytics and research.

We invite our partners and communities to work with us to improve health and redesign the health care delivery system.
