

Join the Making Dialysis Safer for Patients Coalition 4-Part Webinar Series

Breaking the Mold: Dialysis Infection Prevention in Non-Traditional Settings

This 4-part webinar series spotlights barriers and solutions to improving dialysis infection prevention and control in non-traditional dialysis settings. Presentations will feature speakers from the 2024 Making Dialysis Safer for Patients In-Person Workshop. The speakers include hemodialysis service providers focusing on specialized care in nursing homes, home settings, and representatives from state health departments sharing their experiences with hemodialysis in non-traditional environments. We hope you will join us for this information packed series.

****Each webinar has its own link, so please be sure you register in advance for each one. After registering, you will receive a confirmation email containing information on how to join the webinar.*
