Agency: Department of Health – Dental Quality Assurance Commission

Subject of possible rule making:

Licensure requirements for expanded function dental auxiliaries. The Dental Quality Assurance Commission (commission) is considering amending WAC 246-817-195, Licensure requirements for expanded function dental auxiliaries (EFDA), to allow the amalgam clinical patient requirement to be optional. The commission may consider amendments to other relevant licensure requirement rule sections in chapter 246-817 WAC.

Statutes authorizing the agency to adopt rules on this subject:

RCW 18.32.002 and 18.32.0365

Reasons why rules on this subject may be needed and what they might accomplish:

The commission has received feedback from various EFDA programs in Washington State pertaining to the challenges students face finding clinical patients for amalgam restorations due to a reduction of amalgam procedures in the community.

On October 11, 2024, during the Dental Quality Assurance Commission Business Meeting, the commission authorized rulemaking to consider amending WAC 246-817-195 making the amalgam clinical patient requirement optional. Updating this rule could modernize the requirements and remove barriers for EFDAs pursuing licensure in Washington State.

Identify other federal and state agencies that regulate this subject and the process coordinating the rule with these agencies:

None

Process for developing new rule (check all that apply):

- Negotiated rule making
- Pilot rule making
- Agency study
- Other (describe) collaborative rulemaking

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting:
