<a href="#">HB 2072</a>	Opioid impact fee on opioid manufacturers	<p>This bill proposes levying an opioid impact fee on manufacturers that supply over one hundred thousand morphine milligram equivalents (MME) of opioids during a quarter year in the state of Washington. The stated goal of the bill is to sustain and expand behavioral health services. These manufacturers would be charged a fee, one cent per MME, for a prescription opioid dispensed and reported to the prescription monitoring program (PMP) each quarter.</p> <p>All impact fees collected by DOH must be deposited into the prescription opioid impact account and may only be spent after appropriation. Expenditures from the account must be used to fund programs that provide outreach, treatment, or recovery support services for persons living with behavioral health challenges. Fifty percent of the funds must be expended on behavioral health programs that serve children, youth, and young adults. Funds must also be used to reimburse the state general fund with interest for any amounts appropriated to the department during the 2025-2027 biennium for costs to modify the prescription monitoring program to implement the requirements of section 3 of this act. The Attorney General has the authority to enforce this bill.</p>	<p><b><a href="#">HB 2072</a></b>  <i>Sponsor(s):</i> Representative Davis  <i>Introduced: 4/8/2025, referred to Appropriations committee.</i></p>

<a href="#">E2SHB 1686</a>	Health care entity registry	<p>The original version of this bill established a health care entity registry in Title 70 RCW with annual reporting requirements for various health care facilities.</p> <p>The engrossed second substitute bill seeks to “develop a plan and recommendations with the goal of establishing a complete and interactive registry.” The department is tasked with developing the plan and recommendations with consultation from the HCA, OIC, governor’s office, and OFM, as well as input from stakeholders.</p> <p>The plan and recommendations must identify health care entities that would be required to provide regular reports to the registry. These include but are not limited to “licensed and unlicensed facilities, providers, provider groups, systems, carriers, and health care benefit managers.” The department must also identify information that must be reported and fees to be charged to registering entities.</p> <p>The department must consider opportunities to streamline reporting and information sharing, strategies to “fully understand and monitor” the business structure of health care entities in Washington, including elements such as ownership, funding, and affiliations with external organizations. The department would need to provide an update to the legislature by December 31, 2027 and a final report by December 31, 2028.
