**Purpose of the proposal and its anticipated effects, including any changes in existing rules:** The department is proposing amending fees for all programs within the Office of Drinking Water to ensure program costs are adequately covered. These fees must be set at a level that covers the costs of administering each program or license.

**Reasons supporting proposal:** The department completed a financial assessment and determined the current fees are not generating sufficient revenue to cover the operating costs over the biennium. Establishing updated fees is necessary in order to address increased program expenses, existing program deficits, reductions in funding from General Fund State (GFS) and cost-of-living and job classification adjustments made in the 2025-2027 state budget (ESSB 5167). RCW 43.70.110 and 43.70.250 authorize the Secretary of Health to establish various fees associated with licensing and regulation of professions, occupations, or businesses.

**Statutory authority for adoption:** RCW 43.70.250, RCW 43.70.110, RCW 43.20B.020, RCW 70A.100.130, RCW 70A.120.150, RCW 70A.120.160, RCW 70A.125.100, RCW 70A.125.070

**Statute being implemented:** RCW 43.70.250, RCW 43.70.110, RCW 43.20B.020, RCW 70A.100.130, RCW 70A.120.150, RCW 70A.120.160, RCW 70A.125.100, RCW 70A.125.070

(2) For purposes of determining the operating permit fee, service connections (~~shall~~) will be counted as follows:

(a) For community water systems, the operating permit fee is based on the total number of residential service connections and non-residential service connections.

(b) Nonresidential service connections are counted as one service connection for each property as defined in WAC 246-294-010(11) regardless of how many buildings are on the property.

(3) For NTNC and TNC systems, owners shall pay the fee in Table 2 based on equivalent number of service connections. Population information used in calculating equivalent number of service connections (~~shall~~) will come from the WFI. The department shall use the following formulas to determine equivalent number of service connections:

(a) For NTNC populations, divide the average population served each day by two and one-half; and

(b) For TNC populations, which include recreational service connections, divide the average population served each day by 25.
