Purpose of the proposal and its anticipated effects, including any changes in existing rules: The proposal updates and makes revisions to WAC 246-840-015 through 246-840-125 and 246-840-210 through 246-840-260 to clarify and reflect current best practices for licensure pathways and continuing competency requirements for RNs and LPNs. In addition, it simplifies language, reduces barriers for applicants educated outside the United States, clarifies endorsement pathways for multistate license holders, and incorporates new requirements regarding the National Council Licensing Exam (NCLEX) retake limits.													
Reasons supporting proposal: RCW 43.70.041 requires the board to formally review its rules at least once every five years to simplify, streamline, and improve regulations. This proposal is Phase 1 of the board's comprehensive review of chapter 246-840 WAC. Phase 1 addresses licensing and continuing competency requirements for RNs and LPNs. The proposed amendments of this phase clarify and update outdated language, restructure and reformat sections for usability, and align licensing and continuing competency requirements with current best practices. The proposal makes amendments that will reduce barriers and improve rule clarity for applicants, licensees, nursing education programs, and employers by: - Clarifying documentation and English proficiency standards for applicants educated outside the United States. - Simplifying requirements for nurses seeking multistate licensure or endorsement from other U.S. jurisdictions and Canadian jurisdictions. - Clearly providing expectations for transcript submission and NCLEX examination attempts. - Updating terminology throughout the chapter by replacing "commission" with "board."
