

One Team: Discussion Series - For Community Residential Providers

Our Quality Assurance, Training, Nursing and Residential Units have created a collaborative project offering support to community residential providers. Every quarter we will host a 1.5 - 2-hour Teams meeting including a 30 – 50-minute presentation by at least one guest host. The hosts are content experts on their discussion topic.

The session will consist of a 30 – 50-minute presentation, which will be casual and include opportunities to ask questions and share experiences. The session will also be interactive and include breakout sessions where participants can learn from each other in a smaller group setting. Remember, this is a discussion series – which requires **active participation**. In the last 10-15 minutes, resources will be reviewed.

Providers will receive Continuing Education Credit for full participation (2 CEs) and will need to thoughtfully complete an online quality survey. On the survey, providers can also propose future discussion topics, provide feedback on the session, and ask detailed follow-up questions.

Our next discussion will be on June 17th, 1 - 3:00 p.m.

Supporting Successful Transitions

The Transitions Framework and Roads to Community Living – The Developmental Disabilities Community Services Transition Care Team will present best practices, planning strategies, and resources, for implementing successful community transitions.

***Presenters:** Michelle Hoffman, DDCS Transitional Care Program Manager - Tom Farrow, DDCS Community Transition Unit Manager - and Ronald Bryan, DDCS Roads to Community Living Quality Improvement Specialist.*

Follow these instructions to Register.

Please send an email to Robin.Wiseman@dshs.wa.gov in the subject line write: **One Team: Discussion Series – Registration**. In the email content, you also need to include **your name, company name, phone number, title, and email**. Robin will then forward the meeting link several days before the meeting. **Space is limited**, so if your availability changes, please let Robin know so someone else can be added to the discussion.
