TOPICS

Climate change science for
Puget Sound riparian
& floodplain areas

Planning tools, implementation
strategies & tactics

Managing for drought, heat
stress, flood, fire, invasive
species, & pests

Incorporating agroforestry
& commodity buffers

Habitat improvements for water
quality & salmon recovery

A workshop focused on restoration practices that encourage a more resilient ecosystem in the face of a changing climate. Detailed agenda forthcoming.

Hear from restoration and forest ecologists, climate experts, resource planners, and landowners about what is changing, what we need to plan for, and adaptive management approaches.
