KITSAP COUNTY 2019 EMERGENCY MANAGEMENT SECURITY SUMMIT

It is all too common to see the following headlines today...Identity Theft, Data Security Breach, Ransomware Strike, Malware Attack!...the news media is chock full of these stories across our nation and our state. Historically it has been so easy to say *"it only happens to someone else"* but crimes of terrorism are happening right in our own backyard, every day; to your neighbors, local organizations and us!

OK, So WHAT Are We Doing About This?

Kitsap County Department of Emergency Management (KCDEM) is hosting a Security Summit on **Tuesday, October 15, 2019**, at the **Kitsap Golf and Country Club** and **YOU are invited!**

At this **No Cost** first of its kind Summit, you will hear from government and industry experts, AS WELL AS THOSE WHO HAVE ALREADY BEEN IMPACTED, on various aspects of security for your business or organization. This important One-day gathering is focused on 5 pillars of Risk: Personal Security, Facility Security, Financial Security, Internet of Things and Performing a Vulnerability Assessment to identify and reduce risk in these areas.

Come join this important conversation, meet Security leaders from United States Security Service, Dept of Homeland Security, FBI, ISSA and noted National Cyber Security, InfoSec and Physical Security Speakers and Trusted Advisors who invite you to learn:

- What crime is really happening? What should I know?
- What is the impact to my business?
- What is my risk and what is the Security of my Security?
- What should I be doing to improve my security and protect my employees, customers, patrons and my bottom line?

KCDEM invites nonprofit, education, healthcare, faith-based, small and medium businesses and tribal entities to attend this Security Summit, Tuesday; October 15th at Kitsap County Golf and Country Club.
