

2025 REGIONAL WATER CYBERSECURITY WORKSHOP

The Water Sector Workshop engages water sector professionals and response partners for a closer look at emergency preparedness, response, and recovery during and after a Cybersecurity Incident at a water facility. During day 1, dive into operational considerations to respond to a cyber-attack. Day 2 will focus on administrative impacts during a cybersecurity incident. Both days will include an executives round table for general managers, superintendents, and other decision makers! Attendance for both days is NOT required.

.7 CEUs have been accepted by WA DOH/ECY, eligible for only one day
