Application Questionnaire:

Project Title:

Project Area:

Describe the area in which work would be conducted. Include an overview of relevant watersheds and their flood risk.

Please provide a Brief Project Description.

Provide a brief description of the proposed project including tasks, goals, and desired outcomes.

How will the results of this funding help you mitigate risk?

Provide a brief description of how the proposed project will help your jurisdiction identify or plan for flood risk mitigation projects. How will this grant help move your community tangibly towards future mitigation projects and community resilience?

How will it help you understand your flood risk hazard?

Provide a brief description of how the proposed project will reduce gaps around flooding knowledge and move the community towards actionable resilience projects.

How are you accounting for vulnerable populations?

Provide a brief description of the proposed project will reduce flood impacts for overburdened or otherwise vulnerable populations.¹

¹ “Overburdened communities are communities that experience disproportionate environmental harms and risks due to exposures, greater vulnerability to environmental hazards, or cumulative impacts from multiple stressors.” (Washington State Environmental Justice Task Force Report, 2020) [The Washington Health Disparities Map](#) is a good place to start exploring these population in your jurisdiction, though there may be regional and local experiences that are not captured by this tool.

How are you or will you coordinate with other relevant stakeholders and Tribal Nations?

Provide a brief description of existing or planned coordination with relevant stakeholders such as community groups, non-profit organizations, local governments, existing flood studies and projects, and state agencies.

How will you complete your project in the proposed timeline? Do you have the staff or contacts in place to begin work quickly?

Describe how you will be able to quickly begin work if awarded. Provide details on what staff are contracts that are already in place that could be utilized to begin project work. Provide a brief timeline of work.

Total Cost:

Provide the total proposed cost of the project (must be \$300,000 or below) and provide an overview of how those costs will be spent (e.g. salary, consultant, etc...)
