DEMYSTIFYING THE BRAIN

UNDERSTANDING THE CONNECTION BETWEEN THE BRAIN, BEHAVIOR AND RECOVERY

WHEN

June 3rd & 19th
9 AM – 4 PM

TRAINING PROVIDED BY

Mary D. Moller

PhD (h), DNP, ARNP, PMHCNS-BC,
CPRP, FAAN

LEARNING OUTCOMES

- Describe the key brain structures and functions significant to the recovery process
- Learn what medications can and cannot do to facilitate recovery
- Discuss the neurophysiology of perception, cognition, emotion, behavior, and relationships
- Describe the post-psychotic adjustment process and how the brain's recovery affects the person's recovery

PURPOSE OF THE WORKSHOP

On Day 1 Participants will learn a fun, new approach to understanding the key structures and functions of the brain. By viewing and discussing brain scans that depict the neurobiological differences in the brains of individuals living with psychiatric disorders, attendees will gain a deeper appreciation of the daily struggles facing the people we serve.

On Day 2 Participants will engage in a new approach to developing recovery plans based on the four phases of the post-psychotic psychological recovery process.
