

Professional Development

Center for Deaf and Hard of Hearing Youth Educational Interpreter HUB

The Center for Deaf and Hard of Hearing Youth (CDHY) invites all Washington PreK-12 Educational Interpreters to engage in the CDHY Educational Interpreter Mentor Program on Zoom. This program is an opportunity for educational interpreters of all skill levels to come and participate in language development, interpreter processing, discourse mapping, and techniques for evaluating our own work and personal development. You can find more information about professional development opportunities in March on the Interpreter Mentor Program [webpage](#).

In addition, you may find the following trainings helpful:

Roots of Inclusion Webinar: Using a Strengths-Based, Whole Student Evaluation Approach

March 12, 2025 | 4–5 pm | Virtual

Join us for an engaging webinar that explores the Special Education evaluation process as a powerful tool not only for determining IEP eligibility but also for identifying access needs, dismantling barriers, and informing a truly inclusive IEP.

This session will highlight how educators and systems can shift their approaches during the evaluation process ensuring disabled students thrive in environments that honor all learners and challenge outdated perspectives on disability.

Registration is required and is free to attend. For more information and to register, visit the Roots of Inclusion [webpage](#) or [refer to the attached flyer](#).

Special Education Technology Center Professional Development Opportunities

The Special Education Technology Center's (SETC) webinars address technology tools and strategies to support inclusive learning environments. SETC will be offering a variety of community of practice sessions and free webinars during the month of March. Sign up for webinars by logging in to the [SETC website](#), selecting the title you are interested in, and proceeding with registration. You can also find more information about upcoming webinars and other opportunities on the SETC March events [flyer](#).
