

Devon Council Permit Scheme

Devon are proposing to move from a noticing to a permit for works scheme early 2020. Works promoters will apply for permission to complete works on the public highway in advance – this is a ‘works permit’. DCC will be required to consider the permit and approve/reject or propose conditions and apply a relevant fee. All permits received where DCC do not respond will be deemed to be approved. The scheme is intending to cover all roads in Devon that are maintainable at public expense.

Project Timeline

What Is the Scope?

What are the benefits of the scheme?

A permit scheme supports DCC in our legal duties to coordinate works and reduce disruption.

Improved coordination of roadworks by implementing the DCC Permit Scheme with result in:

- improvements to overall network management
- reduced congestion on the road network
- improved journey time reliability
- a reduction in costs to local businesses caused by delays
- the improved general quality of life, particularly for residents
- reduced greenhouse gas emissions and levels of noise
- improved customer satisfaction

How can I learn more?

A public website has been set up : <https://www.devon.gov.uk/worksp permit-scheme/>
