

Devon Virtual School

We are committed to achieving the best possible outcomes for children in care as we are their corporate parents. The Virtual School supports all children in care who are living in Devon or who are looked after by Devon but living in another part of the country.

We aim to:

Promote	High aspirations and excellent educational outcomes
Support	Children and young people, carers, schools and settings
Challenge	Anyone who does not deliver on our aspirations
Celebrate	All our successes

The Virtual School monitors the educational outcomes for all children in care.

They work closely with other professionals, together with parents and carers, to ensure that children receive the best education possible and get the support they need.

We are determined to work with Foster Carers to ensure every child receives the best support we can offer. Every child has an **Area Learning Advocate** who will get to know the child and monitor their educational progress and can help identify additional support to help them achieve. If you have any questions or concerns please contact your Area Learning Advocate below.
